DECLARATION UNDER 37 C.F.R. § 1.131

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

I, David J. Bates, state and declare that:

1. I am the inventor of claims 1-23 of U.S. Patent Application No. 10/763,832 titled "TIME RECORDING AND MANAGEMENT SYSTEM" (hereinafter "the '832 application").
2. Prior to the July 26, 2002, the filing date of U.S. Patent Application Serial No. 10/205,204, I conceived and reduced to practice in the United States, the ideas set forth in the above-listed claims in the '832 application and described in the '832 application as evidenced by the attached Exhibit.
3. The attached entire Exhibit (including the sheets labeled "FIG. 3", "FIG. 6", "FIG 8", "FIG. 9", "EXHIBIT E", "EXHIBIT F", "EXHIBIT G", "EXHIBIT B", EXHIBIT C" AND EXHIBIT D") is an exact copy of the redacted screenshots included in US provisional application serial number 60/442,145, from which the present application claims priority. Each of the screenshots of the entire Exhibit was taken from a spreadsheet and associated macros, which were reduced to practice before July 26, 2002. The sheet labeled

"FIG. 3" indicates that the daily timesheet is for the fiscal year 2002, which in the particular circumstance ended on January 31, 2003. The sheet labeled "FIG. 8" further indicates reduction to practice and use of the illustrated spreadsheet and associated macros as early as February 2002. Note that time values were calculated for the entire month of February 2002. The sheet labeled "FIG. 9" further evidences use of the spreadsheet and macros as early as February 2002. The sheets labeled "EXHIBIT E", "EXHIBIT F", and "EXHIBIT G" (labels from the provisional application (60/442,145)) illustrate software code for the macros. This software code was used to generate the numerical values and other items shown in cells of the screen displays depicted in the above-described Figs. 3, 8 and 9. The sheets labeled "EXHIBIT B", "EXHIBIT C" and "EXHIBIT D" (labels from the provisional application (60/442,145)) illustrate formulas (including associated function calls and links) in the cells of the spreadsheet. These are the same formulas used to generate the numerical values and other items shown in the cells of the screen displays depicted in the above-described Figs. 3, 8 and 9.

4. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements are made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing therefrom.

FIG. 3

The image shows a computer screen with a spreadsheet application. The spreadsheet has columns labeled A through Q. The data includes dates, times, and numerical values. A dialog box titled "Update Time / Generate Report" is open in the center, with options like "Reopen / Update Time for One Day", "Close / Print Time for One Day", "Close Time for One Day", "Retotal / Close Time for All Days", and "Cancel". The spreadsheet data includes rows for dates from 1/3/03 to 1/6/03, with times and numerical values. A large handwritten number "55" is visible on the right side of the spreadsheet. The taskbar at the bottom shows various open applications like "Inbox - Micro...", "Microsoft...", "MANAGE - (I...", "United State...", "My Computer", and "Microsoft W...".
